Ajinkya Balaji Ganji

has successfully completed the online Specialization

Introduction to Discrete Mathematics for Computer Science

Discrete Math is needed to see mathematical structures in the object you work with, and understand their properties. This ability is important for software engineers, data scientists, security and financial analysts (it is not a coincidence that math puzzles are often used for interviews). We cover the basic notions and results (combinatorics, graphs, probability, number theory) that are universally needed.

Alexander S. Kulikov
Professor
Department of
Mathematics and
Computer Science

Michael Levin
Lecturer
Computer Science

Владимир
Подольский
Доцент
Факультет
компьютерных наук
